## **Total Ankle Arthroplasty Protocol**

Phase 1	Surgery to 6 weeks post-op
Appointments	Rehabilitation appointments begin approximately 14 days after surgery, 1-2 times per week
Rehabilitation Goals	<ul> <li>Activities of daily living (ADLs) with safe crutch/walker use; instruction as needed</li> <li>Control swelling and pain</li> <li>Begin ankle range of motion (ROM) at 2 weeks: Dorsiflexion (DF)/plantar flexion (PF)</li> <li>Maintain hip and knee ROM</li> <li>Increase hip, knee and core strength</li> </ul>
Precautions	<ul> <li>Non-weight bearing (NWB); short leg cast for two weeks, followed by tall CAM boot for one month or until week 6</li> <li>Watch for signs of infection</li> <li>Avoid long periods of dependent positioning of the foot and complete frequent elevation</li> </ul>
Suggested Therapeutic Exercise/Treatment	<ul> <li>Frequent elevation of ankle above the level of the heart</li> <li>Ankle active range of motion (AROM: DF/PF)</li> <li>Four way leg raises lying down</li> <li>Knee AROM</li> <li>Transverse abdominis recruitment</li> <li>Edema massage</li> </ul>
Cardiovascular Exercise	Upper Body Ergometer (UBE)
Progression Criteria	<ul><li>6 weeks post-op</li><li>No wound complications</li></ul>

## **Total Ankle Arthroplasty Protocol**

Phase 2	Begin after meeting Phase 1 criteria (usually 6 weeks after surgery)
Appointments	• Rehabilitation appointments are 1-2 times every 1-2 weeks
Rehabilitation Goals	<ul> <li>Reduce swelling</li> <li>Increase ankle ROM in all planes</li> <li>Weight-bearing tolerance in boot with safe ADL progression</li> <li>Increased mobility of scar</li> <li>Maintain hip/knee ROM, strength and flexibility</li> </ul>
Precautions	<ul> <li>Progress weight bearing in boot per surgeon's instructions</li> <li>MUST be pain free, normal gait</li> <li>Week 6-10 in CAM boot: <ul> <li>Week 6-8: up to 50% weight bearing</li> <li>Week 8-10: progression to full weight bearing</li> </ul> </li> <li>Week 10: Begin progression into normal shoe</li> <li>Continue to sleep in the boot</li> </ul>
Suggested Therapeutic Exercises	<ul> <li>Gait training and weight shifts</li> <li>Ankle AROM/passive range of motion (PROM)</li> <li>Calf stretching</li> <li>Scar massage and soft tissue mobilization of calf</li> <li>Joint mobilization: focus on talocrural distraction to improve ankle DF/PF</li> <li>Four-way ankle isometrics</li> <li>Seated tilt/BAPS board</li> <li>Seated knee extension and prone hamstring curls against gravity (no ankle weights)</li> <li>Four-way leg raises in standing</li> <li>Transverse abdominis strengthening</li> </ul>
Cardiovascular Exercise	<ul> <li>Stationary bike (in boot, no resistance)</li> <li>Swimming (once wound is fully healed)</li> <li>Aquatic therapy may begin if available</li> </ul>
Progression Criteria	<ul> <li>Able to ambulate independently in walking boot</li> <li>Active ROM between 5<sup>o</sup> DF and 20<sup>o</sup> PF</li> </ul>

## **Total Ankle Arthroplasty Protocol**

Phase 3	Begin after meeting Phase 2 criteria (usually 10 weeks after surgery)
Appointments	Rehabilitation appointments are once per week
Rehabilitation Goals	<ul> <li>WBAT in shoe</li> <li>Normalize gait without assistive device</li> <li>Retrain ankle proprioception</li> <li>Improve ankle strength</li> </ul>
Precautions	<ul> <li>Avoid exercises that create movement compensations</li> <li>Wean from boot and progress WBAT, with use of Hely-Weber Zap ankle brace as needed</li> </ul>
Suggested Therapeutic Exercises	<ul> <li>Gait training</li> <li>Scar massage and joint mobilizations as needed</li> <li>Calf stretching</li> <li>Four-way ankle strengthening with resistance band</li> <li>Balance and proprioception exercises</li> <li>Functional movements (squats, steps)</li> <li>Core and lower extremity strengthening</li> </ul>
Cardiovascular Exercise	<ul><li>Stationary bike</li><li>Swimming</li><li>Aquatic therapy</li></ul>
Progression Criteria	<ul> <li>Able to ambulate independently in shoe</li> <li>Able to complete bilateral heel raises</li> </ul>

Page 3 of 4 OIPT.08.20.21.ver1

## **Total Ankle Arthroplasty Protocol**

Phase 4	Begin after meeting Phase 3 criteria (usually 14 weeks after surgery)
Appointments	Rehabilitation appointments are once every 2-4 weeks
Rehabilitation Goals	<ul> <li>Normal gait pattern</li> <li>Single leg stance with good control for &gt;10 seconds</li> <li>Ankle ROM between 10° DF and 35° PF</li> <li>Able to complete single leg heel raise</li> </ul>
Precautions	<ul> <li>Avoid forceful impact activities</li> <li>Anticipate return to golf at 3-4 months, hiking at 4-5 months</li> </ul>
Suggested Therapeutic Exercises	<ul> <li>Balance and proprioception exercises on unstable surfaces</li> <li>Higher level core and lower extremity strengthening exercises</li> <li>Higher level functional movements (floor transfers, lunges walking on hillsides)</li> </ul>
Cardiovascular Exercise	<ul> <li>Stationary bike progressing to outdoor cycling</li> <li>Swimming</li> <li>Walking</li> <li>Golfing</li> </ul>
